

Automate processes to improve your productivity, communication, and collaboration

Do paper-based processes slow down your productivity?

Create electronic forms that are accessible at any time and on any device. Integrate data from line of business applications to improve efficiency and user experience.

Do you need secure access to sensitive data?

Securely access and share data on any device while maintaining regulatory compliance.

Do you need greater access to real-time data and analytics?

Unlock the power of your data and gain access to real-time information to make data-driven business decisions.

Case Study:

When an insurance provider needed secure, remote access to claims documents, Elantis was there to help.

Like many organizations, the insurance provider's employees began working remotely in response to the COVID-19 pandemic. Due to security and privacy concerns, paper forms could not be removed from the company's facilities.

The solution was to digitize the forms and automate the claims processes. This enabled staff to securely access the information from remote locations and continue operations uninterrupted through the pandemic.

ELANTIS

Improve your collaboration, communication and productivity with low-code/no-code solutions from Elantis
