Edmonton, Alberta — January 27th, 2021 — Elantis Solutions Inc. announced a new partnership with UK's Proventeq, expanding their toolset for successful content migrations.

Enterprise content management and business process automation specialists, [Elantis Solutions Inc.](#), announced its latest partnership agreement with [Proventeq](#), a specialist provider of content migration and digital workplace solutions.

The partnership will combine two companies' expertise in content migrations using Proventeq's flagship product, the Migration Accelerator, to help clients gain the maximum value from their content through migrations and optimization.

Proventeq's Migration Accelerator is compatible with platforms such as SharePoint, OneDrive, OpenText, Oracle, M-Files, G Suite, and many others. It provides actionable insights to mitigate risks during content migration and allows clients to enrich and restructure content as needed.

"We have seen many clients accelerate their cloud strategy as users increasingly require access to information from any location and on any device," explains Elantis CEO, Dave Roe. "Elantis is focused on providing our clients with a seamless transition to the cloud, no matter which platform they are currently using. Our partnership with Proventeq gives Elantis another tool to provide value to our clients throughout the migration process."

Balu Herbert, Proventeq co-founder says, "Proventeq is excited to expand our reach into the North American market with Elantis. Together, we look forward to helping meet our clients' content management requirements and creating frictionless migration experiences.
