

From Idea to Agent, in a Single Day

Discover the power
of Copilot Agents

This immersive workshop
blends instruction with real-
world application, ensuring you
walk away with a working
Copilot agent tailored to your
business needs.

REAL RESULTS IN JUST ONE DAY

Practical, business-
focused
understanding of
Copilot Studio.

Your business
challenge, turned
into a real-world AI
use case.

A working Copilot
Agent, built for your
business and ready
to launch.

Let's Build Your First Copilot Agent - Together.

Skip the Theory, Build What Matters

This is more than a demo. You'll leave with a working Copilot Agent designed for your business.

How it Works

Session 1: Instructional

- Overview of Copilot Studio
- Capabilities of virtual agents
- Identify Copilot agent use cases for your organization

Session 2: Hands-On Build

- Guided agent creation for your use case
- Testing and deployment readiness

Use Agents For

- **IT Helpdesk:** Automate password resets, ticket creation, and FAQs
- **HR Onboarding:** Guide new hires through onboarding steps and policy questions
- **Customer Service:** Handle order status, returns, and basic troubleshooting
- **Internal Knowledge:** Answer employee questions using internal documentation
- **Appointment Scheduling:** Books meetings or service appointments via calendar integration
- Many other use cases, customized to your needs!
